DO WHAT'S GOOD FOR YOUR BUSINESS

Protect your business from fraudulent activity and retain your valuable customers

More than 80% of security breaches involving credit card data occur at small businesses. Offenders target small merchants because many have lax security procedures if any at all. Once lost, the cardholder data can put you at a serious risk involving fines, lost sales, fraud losses, termination of ability to accept payment cards and even going out of business.

PCI Security Standards Council put forth the PCI-DSS, or the Payment Card Industry Payment Application Data Security Standard, which outlines the best practices for securing sensitive data. The standard is so well written, it can serve as a foundation for your risk management strategy. By utilizing the PCI standard as a guide you can increase the efficiency of your operations, and decrease costs. The true ROI of becoming PCI compliant in the long run, however, will come from building trust of your customers, choosing to take their business to you.

PCI-DSS encompasses many requirements, but one of the key items is a currently PCI-DSS validated POS system. Through robust encryption methods and detailed security logging, **PCI-DSS certified Retail Pro v8.6 and Retail Pro v9** provide the retailer assurance that their software is doing its part to protect their customer's payment information from harm's way.

Here at Retail Pro we don't stop at creating robust and secure POS solution that keeps you competitive in a rapidly changing world of retail. We also create systems that allow you to build on your retail technology investment and prepare for what comes next. That's the power of Software Assurance program.

As we introduce new releases Software Assurance allows you to update your systems to always be in sync with the latest features and security standards available. With Retail Pro you can count on continuous product improvements, feature enhancements, ultimate security and top-notch support every step of the way. Once you reach PCI Compliant status, Software Assurance protects your technology investment by maintaining compliance and future-proofing your POS operations.

Don't put your business at risk, use only certified POS software. We will help you plan your transition to PCI-DSS certified product, and assist in realizing the return on investment that is possible with the modern day Retail Pro system.

To learn more about PCI-DSS compliance and ever-growing feature sets of the currently certified Retail Pro products, contact your Retail Pro Certified Business Partner.
