

Intuit QuickBooks Point of Sale 2013

Get the sales, inventory and customer information that helps you understand your business so you can make better business decisions.

Detailed sales and inventory reports let's you know what is selling and what is not

- Instant reports can show you top selling products, best customers and sales data for any time period you choose.
- Save inventory tracking time. No manual tracking—your inventory is updated with every sale, order, and return.

Instantly view what's in stock, what's hot, and what needs to be reordered

- Set reorder points and automatically generate purchase orders so you never run out of inventory and lose a sale. (Pro)
- For even more control, you can track layaways, sales orders, serial and UPC codes. (Pro)

Automatically track and reward your best customers

- Use the customer center to easily access your customers contact information, like birthdays and last item purchased.
- Keep customers coming back with loyalty programs, gift cards, and personalized email reminders, updates, and specials.

All your information automatically syncs with your QuickBooks financial software

- Transfer data to QuickBooks Accounting software with a click. You won't have to worry about data entry errors from retyping data and will be better prepared at tax time.

Never miss a sale whether you are on the road, or have a long-line in your store

- With the new mobile sync feature, you can accept credit cards on your smartphone or tablet—all sales and inventory information syncs with your POS software.

Ring up sales "on the go" with a smartphone or tablet

Activate your integrated payments account to save time and increase sales

- Ring up sales in your store or on the go and know that all information automatically syncs with POS software.
- An integrated payments account eliminates the hassles of manual data entry and reconciliation.
