

QB POS Linking to QB Accounting January, 2015 QB POS v2013

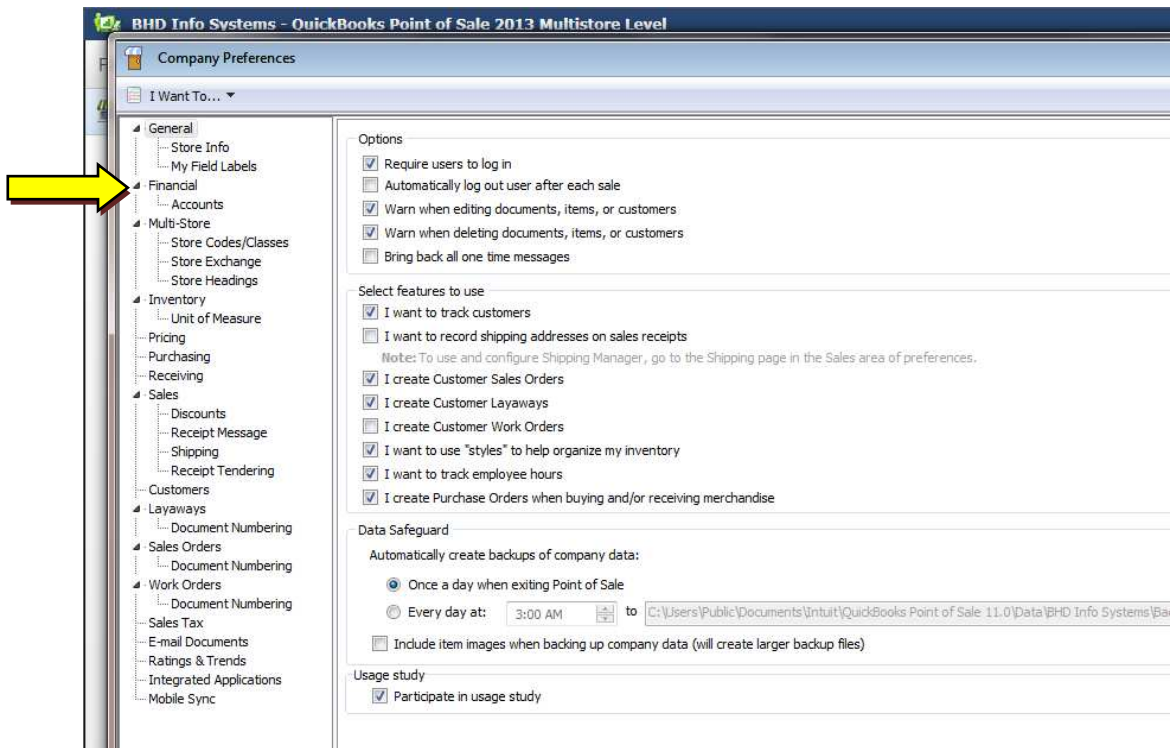

In QB POS v2013 you Link your QB POS data with you QB Accounting software.

1. You will go to File, then Preferences, and select Company.

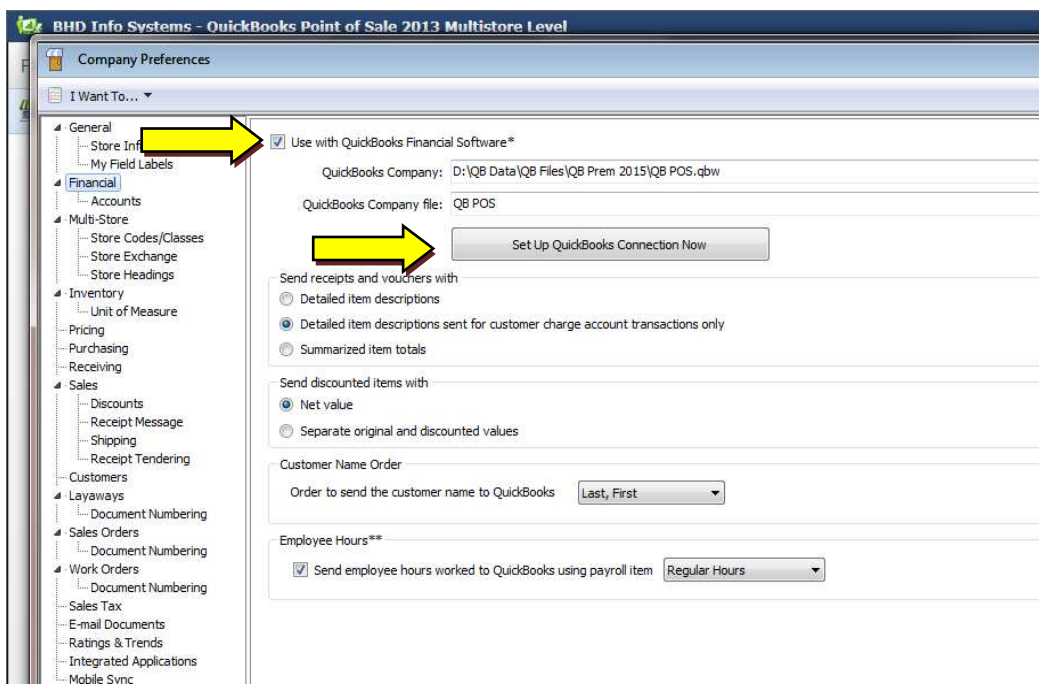

Note: QB Accounting **must** be installed on your QB POS **Server computer**. You will need to **open** the **Company File** you wish to synch your data to in your **QB Accounting** software before proceeding.

2. Now select **Financial**.

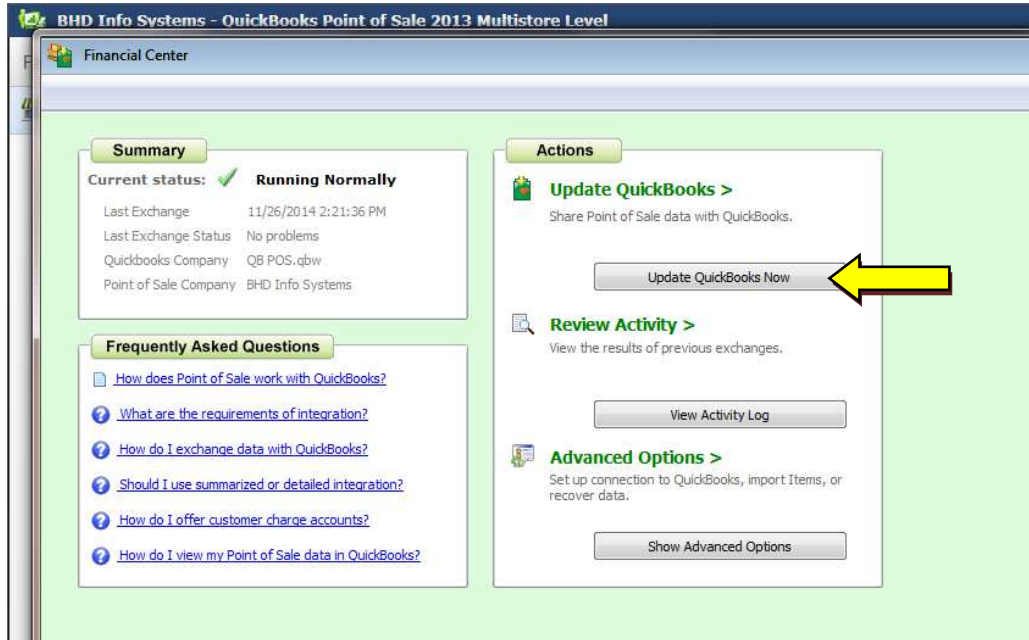

3. Next check **Use with QuickBooks Financial Software***. The click on **Set Up QuickBooks Connection Now**.

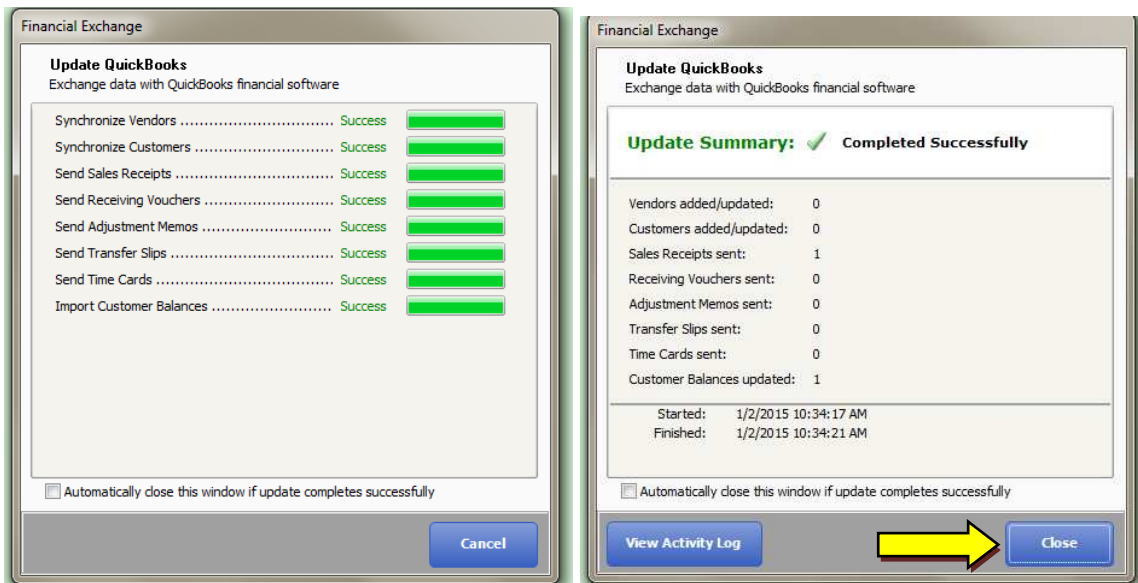

4. QB POS will go find your QB Accounting software and create a connection.

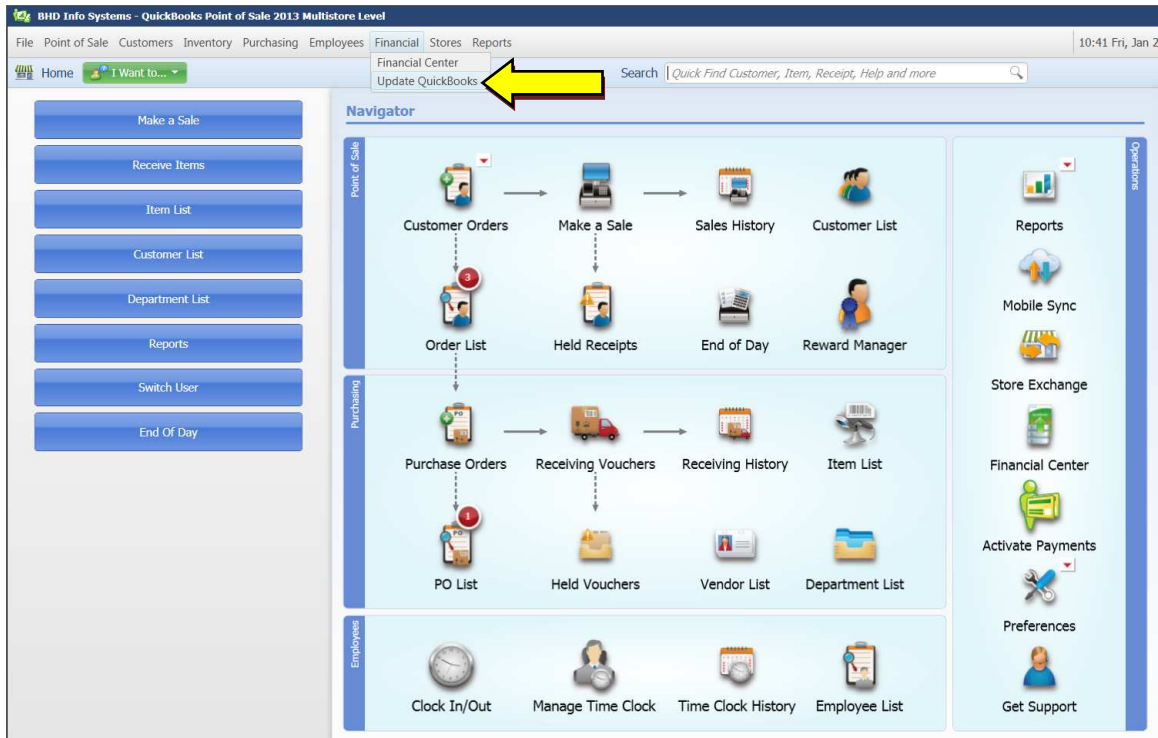

5. To synch your data click **Update QuickBooks Now**.

6. You will see data being synched and the results of the data synch. Click **Close** to finish the synch.

- Now that your connection is setup you can synch your QB POS to your QB Accounting by choosing **Financial** then **Update QuickBooks**.

- You can also synch you selecting **Exchange data with QuickBooks** when running **End of Day**.
