

Using Committed

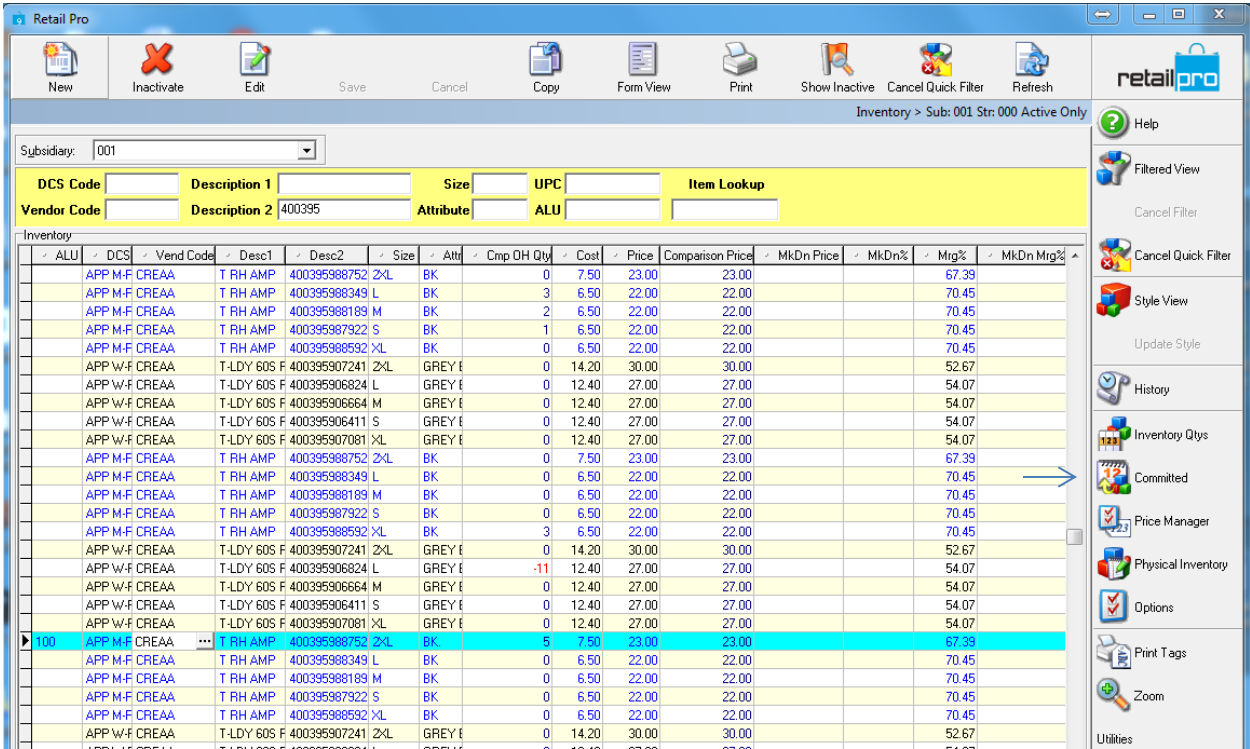

Version 9

https://youtu.be/b_mBxPwtXi0

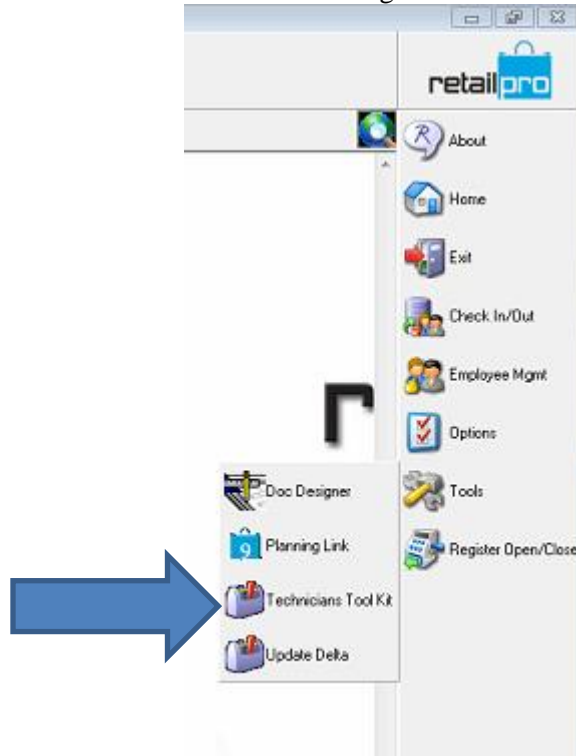

The committed feature allows you to quickly see if an item is on a Purchase order, Transfer Order or a Sales order.

To view the Committed window:

1. Insure you are in inventory Item View. Highlight the item you want to look at, then click the COMMITTED button on the side menu.

5. PLEASE NOTE: if the COMMITTED values do not look correct, they can be recalculated using the RECALC COMMITTED utility. You will find this in the techtoolkit. Login to the techtoolkit.

6. Select INVENTORY from the side of the techtoolkit. Check RECALCULATE COMMITTED QTY and click START.
