

## Use Movelist to Copy Design V9

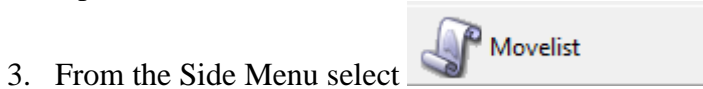

Copy a receipt design to remote stations via the Movelist feature in ECM - V9  
September, 2015

In Version 9 ECM there is a feature to include files in the ECM transmission process to transfer to a folder at the remote. In this document we will go over how to send a receipt design (40col.rpt) to the remote stores automatically.

1. First you need the name of the receipt design you want to transfer, receipt designs are located in retailpro9\design\docdesigns\receipt folder at the main.

2. Open ECM and select

3. From the Side Menu select

4. Select

5. Select

6. On the next screen click

7. Select

8. Use the Windows Navigator to locate the file to send to the remotes

Name	Date modified	Type
ALL DESIGNS	2/28/2015 9:48 AM	File folder
Old Design	2/28/2015 9:48 AM	File folder
40 Col Copy.rpt	3/25/2009 9:25 AM	RPT File
40 Col Shift4 EMV.rpt	6/23/2010 4:26 PM	RPT File
40 Col Shift4.rpt	8/17/2010 11:47 AM	RPT File
40 Col.rpt	3/25/2009 9:25 AM	RPT File
Bigreceipt Gift.rpt	4/14/2014 10:41 AM	RPT File

## Use Movelist to Copy Design V9

9. Enter the Target Path next to the file name for the path to copy the file to on the remote computer to copy the file to when it arrives

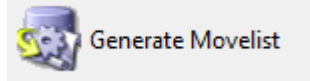

Target Path
\\docdesigns\receipt

10. In the Bottom Section select which remote stations to send the file to.

Movelist Target Stations			
	Enable	Name	Station
	<input checked="" type="checkbox"/>	Sub 003 Export	Main
	<input checked="" type="checkbox"/>	Sub 2 Export	Main
<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Imp/Exp	IPMS

11. Click

12. Click From the Side menu to create the movelist.

During the next ECM Exchange the file will be sent to the remote stores and copied to the folder you specified, any existing file **WILL** be overwritten.
